Ideation Phase: Define the Problem Statements

Date	28 October 2026
Team ID	N/A (Individual Project - Shriyanshu Jain)
Project Name	Global Electric Vehicle (EV) Market Performance & Insights
Maximum Marks	2 Marks

Customer Problem Statements

Problem Statement (PS)	I am (Customer / Persona)	I'm trying to	But	Because	Which makes me feel
PS-1	A Market Strategy Director (Emily)	Determine which vehicle categories and pricing tiers yield the highest sales and customer satisfaction.	I can't clearly see how different categories perform in relation to their driving range.	Global sales, pricing, and performance data are scattered across disconnected spreadsheets.	Hesitant to commit capital to new vehicle platform developments.

PS-2	A Business Intelligence Manager (David)	Map out global competitor market share and locate key manufacturing distribution hubs.	I lack a unified, geographic view of production versus regional market dominance.	Production footprints and sales metrics aren't integrated into a single visual dashboard.	Exposed to supply chain risks and blind to competitor expansions.
PS-3	A Sustainable Mobility Research Analyst (Sarah)	Identify adoption trends of battery technologies (LFP, NMC, Solid-State) and their efficiency.	I struggle to correlate battery capacity (kWh) directly with driving range and segment adoption.	Technical battery specifications are isolated from consumer sales datasets.	Unable to confidently recommend strategic R&D investments for future battery chemistries.
