Dashboard Design

Date	28 October 2026
Team ID	N/A (Individual Project - Shriyanshu Jain)
Project Name	Global Electric Vehicle (EV) Market Performance & Insights
Maximum Marks	4 Marks

Dashboard Layout & Interactive Design

The primary executive dashboard is designed to be clean and uncluttered, consolidating the top 4-5 strategic visuals to prevent information overload. It acts as the anchor point for the 3 personas (Emily, David, Sarah) before transitioning into the 4-point Tableau Storyboard.

Core Visuals Included:

- 1. Total Annual Sales by Vehicle Category (Horizontal Bar Chart)
- 2. Global Manufacturer Market Share (Packed Bubble Chart)
- 3. Global Manufacturing Hubs & Production Output (Filled Geographic Map)
- 4. Battery Technology Adoption Rates (Pie Chart)

Interactive Elements:

- • Action Filters: Clicking on a specific Vehicle Category dynamically updates the Manufacturing Map and Battery Technology visuals to reflect only that segment.
- • Tooltips: Custom tooltips on hover to reveal exact sales units, average customer ratings, and battery capacities without cluttering the screen.

Key Insights Derived from the Dashboard

Sales Dominance: SUVs, sedans, and two-wheelers heavily dominate global annual sales, signaling a high consumer demand for both family utility and urban micro-mobility.

Battery Chemistry Adoption & Efficiency: NMC (Nickel Manganese Cobalt) and LFP (Lithium Iron Phosphate) are the dominant battery chemistries, capturing the majority of the market. Meanwhile, emerging technologies like Solid-State show superior capacity-to-range efficiency for future models.

Geographic Concentration: EV manufacturing is highly concentrated in strategic hubs across Asia, North America, and Europe, presenting both massive supply chain opportunities and potential bottlenecks for market leaders.

Price to Satisfaction Dynamics: Mid-tier pricing segments paired with high-capacity batteries yield the highest customer satisfaction ratings, overcoming traditional 'range anxiety'.
