Scalability & Future Plan

Date	28 October 2026
Team ID	N/A (Individual Project - Shriyanshu Jain)
Project Name	Global Electric Vehicle (EV) Market Performance & Insights
Maximum Marks	4 Marks

Future Scalability Roadmap

Phase	Title	Description
Phase 1	Real-Time Data Automation	Transition from static CSV uploads to a live data pipeline connecting Tableau to dynamic SQL databases or cloud APIs for continuous EV market updates.
Phase 2	Charging Infrastructure Mapping	Expand geographic mapping to include granular city-level data, overlaying public fast-charging station networks to analyze infrastructure gaps and "range anxiety" zones.
Phase 3	Supply Chain & Cost Tracking	Introduce a Procurement Persona. Integrate external datasets to monitor raw material indices (e.g., global lithium supply chain costs) against retail vehicle pricing.
Phase 4	Predictive Analytics & ML Integration	Integrate Tableau with Python (TabPy) or R to run predictive models forecasting year-over-year sales growth, consumer demand shifts, and next-generation battery adoption curves.
